Offshore Accounting and Bookkeeping Services

Reliable support for evolving finance functions

Traditional accounting models, focused solely on compliance and reporting, no longer meet the demands of today's evolving business landscape. As enterprises scale and diversify, the finance function must evolve from a back-office necessity into a forward-looking driver of strategy, performance, and efficiency.

Dezan Shira & Associates supports this shift by combining experienced professionals with advanced technologies to modernize finance operations. Through close collaboration, we help CPA firms and global businesses become agile, scalable, and advisory-driven. Our offshore accounting services, ranging from bookkeeping and tax preparation to payroll compliance, are built for firms looking to transform finance into a source of competitive advantage.

Our offshore accounting solutions

Outsourcing accounting and bookkeeping to our accounting delivery hubs enable firms to reduce operational burden, maintain accuracy, and gain access to a reliable pool of skilled professionals — without increasing overheads. As organizations scale or navigate seasonal shifts, our teams help ensure consistency in service delivery and compliance.

Our India-based delivery centers provide dedicated support across accounting, tax, and payroll functions. With standardized processes, robust controls, and experienced staff, we help clients maintain continuity and accuracy. By shifting transactional activities offsite, internal teams are freed up to focus on strategic planning, advisory, and client-facing priorities.
